

dear fcc,

i just wanted to voice my opinion about xm radio. without xm radio i wouldn't be kept updated on the weather around me and my family members in other cities, also having channels that don't have commercials all the time is a plus for me. xm radio is the wave of the future please reject the nab petition 04-160 and that would be the appropriate thing to do for me and the xm listeners for the years to come.

thank you,
john c. bally
